

1140/3500i-SKIN

Custom color skin for Cisco Wireless access points

Oberon's 1140/3500i-SKIN allows you to customize the appearance of the popular Cisco 1140 and 3500i series wireless access points. The skin is made from an RF transparent plastic, and can be attached directly to the Cisco 1142 or 3500i. The 1140/3500i-SKIN allows you to customize the color of the access point to partially conceal the access point or compliment interior color schemes.

Specifications:

- Fabricated from textured ABS plastic
- The skin is virtually transparent to access point radio frequency transmission
- Attaches to access point with Velcro tabs (included)
- Standard color is black
- Custom colors are available on request for orders of 25 or more for \$10 per unit

Ordering Information:

- Part Number
- 1140/3500i-SKIN

For custom colors, specify a Pantone Matching System (PMS XXX) number. PMS numbers can be found at <http://www.pantone.com/pages/pantone/colorfinder.aspx>
