

1018-14

14 in. Diameter Protective Plastic Wi-Fi Access Point Enclosure with Translucent Hinged Cover

Collection: In-Plane™ | Series: 1018

Aesthetic and economical, Oberon's Envelop™ Model 1018 is a rugged enclosure designed to protect most vendors' APs in many environments. The 1018 is injection molded with UV-stabilized polycarbonate, and includes a captured gasket in the cover to provide capability for outdoor installations. The hinged snap-latch, white polycarbonate cover is virtually transparent to wireless signals. Internal bracket is designed to simplify AP installation.

Limited quantities available.

Features & Benefits

- Impact-resistant, white, polycarbonate enclosure for most vendors' APs, including larger Cisco 2802/3802 Series APs
- Architectural design motif resembling lighting luminaire
- Ideal for protecting APs in indoor and outdoor locations
- AP status LED is visible through cover
- Includes wireless symbol label for user to attach to cover if desired

Technical Specifications

- Design: Round AP enclosure designed to be surface mounted on hard-lid ceilings or walls. Resembles a common lighting luminaire. Designed to accommodate APs with integrated or non-detachable antennas. Large enough for Cisco 2800/3800 APs and other larger APs. For the Extreme Networks 3935i, please order mounting plate 39-1018-EXT3935-MNTPLT
- Performance: UV stabilized, impact resistant, polycarbonate enclosure suitable for indoor and outdoor use. Virtually transparent to wireless signals
- Cover is hinged
- Attachable 'Wi-Fi' symbol decal
- Internal universal T-bar bracket and Cisco mounting plate
- Construction: White polycarbonate plastic body and cover. Cover is translucent, such that AP status LEDs are visible
- AP maximum operating temperature should be de-rated by 7° C when mounted in enclosure
- External size: 14.0 x 5.0 in. (356 x 127 mm)

Fits the following AP's:

- Aerohive**
 AP110/120, AP250
- Aruba**
 AP-135, AP-205, AP-205H, AP-215, AP-225, AP-305, AP-315, AP-325
- Cisco**
